

Ngo Dinh Phuoc

- 🎂 **Birthday:** 3/2/2003
- 🏠 **Address:** Nam Cao, Da Nang, Viet Nam

👋 Brief introduction

Hi, I'm a FullStack developer who can code anywhere.

I started learning to code three year ago.

I have experience working with modern web technologies such as ReactJS, Next.js and also know in back-end like Node.js, Java, Nest.js.

I always strive to learn new technologies, follow best coding practices. My goal is to deliver high-quality products that bring value to users and businesses. I have been very focused on learning Fullstack web programming. Now I am very confident that my abilities can meet your requirements.

👔 Projects

Medicare Central

Medicare Central is an e-commerce platform designed for selling medicines, catering to both end users (customers) and managers (admin panel).

Technologies used: REST API, ReactJs, Tailwindcss, React Router, React Hook Form, Yup, React Query, ESLint, Prettier, React Helmet

Functions include:

- JWT-based authentication.
- Use the Yup and React Hook Form to validate the form.
- Asynchronous data fetching and caching via React Query
- SEO with React Helmet
- Separate the private and public routes.
- Enforced code quality and formatting with ESLint and Prettier

 **Github:** https://github.com/Phuoctryhard/PBL6_FE

IT Recruitment Website

An IT-focused job search platform that allows users to search for jobs, submit applications, and enables administrators to manage job postings, resumes, and users through an admin dashboard.

Technologies used: Nest.js, MongoDB, ReactJs, Tailwindcss, Redux, React Router, REST API.

Functions main:

- Manage authentication using JWT (automatic token refresh applied)
- Integrated email system for users to send and receive notifications

Role-based Access Control

Candidates can:

- Allow users to search for job openings based on various criteria such as location and language
- Apply for jobs, register their skills
- Automatically receive job notifications via email based on registered skills (CronJob)

Admins can: manage users, jobs, resumes, platform content, manage roles, permissions, and companies

HR can: View candidate resumes

Work Experience

 Openverse.Tech – Vietnam

 11/2024 – 5/2025

Openverse.Tech is a startup in Vietnam specializing in software outsourcing and developing modern web and blockchain-based products.

 Role: Fullstack Developer

 Responsibilities & Achievements:

- Developed a full-featured e-commerce platform, including:
 - A customer-facing storefront built with Next.js, an admin dashboard built with ReactJS, a scalable backend REST API developed using NestJS , database : Postgresql
- Implemented key business features such as:
 - AI chatbot integration using n8n workflow automation platform, enabling dynamic customer interactions through RAG-based responses
 - Product catalog with SPU/SKU data modeling, inventory management and order tracking, checkout with payos.
- Designed and enforced secure authentication and role-based access control (RBAC)
- Built and documented RESTful APIs for smooth frontend-backend integration
- Collaborated with clients to analyze requirements and design customized user experiences
- Improved communication and collaboration skills by actively participating in team discussions, code reviews, and agile ceremonies

 Technologies Used:

ReactJS, Next.js, NestJS, TypeScript, REST API, JWT, PostgreSQL, Mobx.

Skills

Web Front-end Technologies

- React, Next.JS, React Router, Redux, MobX, React Query, React Hook Form, Tailwind CSS,Axios, HTML5, CSS3, SEO.

Web Back-end Technologies

- Protocols: REST, HTTP(S)

- Frameworks/Libraries: Nest.JS, Express.JS, Node.JS.
- Databases: MongoDB, PostgreSQL

Cloud & Deployment Services

- Vercel, Netlify, Render, Docker.

Dev Tools

Git, Postman, React Developer Tool, React Query Dev Tool, Github, VS Code, Bash

Honors & Awards

 Academic Scholarship HK1 2024-2025

 First Prize in the Database Competition – Storm House Club 2022

 TOEIC 550  GPA: 3.33 / 4.0

Education

Danang University of Science and Technology - Information security, 2021 - 2025

Participated DUT Hackathon 2023 Tech in Real Life.

Interned at Inotev company 2024 and worked at Openverse.Tech company 2025.
